SKILLS

HTML5/CSS3	JavaScript	jQuery	Java
C#	Selenium	Microsoft SQL Server	SQL
MongoDB	Express.js	React.js	Node.js
Git	Bitbucket	J Unit	Mockito

WORK EXPERIENCE

General Motors - Austin, Texas   **September 2018 – Present**
Software Developer, Manufacturing
Project: Mobile Racking System (MRSS)
- Covered 95% of programming logic through Junit and Mockito for Controller and Service Layers in project's microservices
- Increased code maintainability by reorganizing Data Transfer Object structure using Java
- Deployed production release to manufacturing plant based in Michigan

Software Test Analyst, Manufacturing   **June 2015 – September 2018**
Project: Warehouse Management System (WMS)
- Developed 90 automation scripts covering administrative features for plant based in Detroit
- Derived test scenarios from business requirements to validate Reports and Control Room functionality
Project: GADB
- Provided daily status reports on production counts specified against Oracle DB
- Manually tested production count system in scrum framework
Project: Plant Floor Change Management application (PFCM)
- Created test scenarios from requirements to validate functionality for application
- Collaborated with Dev team to validate and fix defects found in test environment
- Automated 100 test cases covering core features of application
- Mentored test team on GM-based automation framework for automation coverage
Project: Maximo
- Utilized GM-based automation framework to automate 50 test cases for regression testing
- Traced 142 test cases back to business requirements to allow thorough test coverage in Scrum framework
- Identified and monitored defects found in SIT test phase.

Argo Group International Holdings - San Antonio, Texas   June **2014 – August 2014**
Programming & Data Analysis, Intern
- Innovated a standardized database to act as an internal hub
- Developed web-application alongside CIO and director of app development to support underwriting
- Interpreted queries to determine data integrity and provide recommendations
